LADIES' COLUMN.

Fashion Notes.

Gowns trimmed in one-sided fashion lead one to think that the wearer's figure may be like the gown.

Belted waists of muslin are made with box plaits and insertion. Instead of shirring, by some dressmakers.

The prettiest kerchief to wear in the street with a black silk dress is of black and white checked silk.

The children's hats of creases white straw trimmed with wreaths of wild flowers, are called Clyde.

The Saxe glove has no opening at the wrist, and is made of silk, yet both modes are perfect.

"Tally ho" is the name of the short frocks which young girls are to wear in the country this summer.

Real roses are worn on rough-edged ready-straw bonnets which are otherwise very simply trimmed.

Pineapple cloth is made up into neckties with four bands of hem stitching and embroidery on the ends.

Broodery done over padding is used on undergarments. It is very heavy and is spoiled by washing.

A new sleeve pattern is tucked at the top instead of shirred, and caught up on the inside of the arm by a bow.

Stripes of shaded silk and wool in Algerian effects make up one material used for evening wraps this summer.

Work of the summer mantles are worked all over in small interlaced ovals of short bugles and seed beads.

Three yards is considered quite long enough for an American bride train. Those of five yards are left to royal ladies.

Royalists and wristlets of black velvet, trimmed with a network of beads, and with coin pendants, are coming into vogue.

A novelty in sashes is a cravat bow, of rose color, caught up in the form of a rose, with accompanying leaves of green metal gauze.

A costume universally admired always suitable for full dress this summer is white satin, silk, shirred and trimmed with white Spanish lace.

The latest novelties in parasols differ somewhat in shape from those with which we are familiar, being much larger, while their high canopied top suggests a balloon cut in two.

The latest new fabric for summer wear is silk muslin, a mixture of silk and wool, which is very soft and pliable and well adapted to the most elegant toilets, and Japanese printed crepes, which exactly copy the designs brought from Japan.

An Appeal to the Girls.

Girls, don't be so delicate this summer. Don't be so helpless. Get out of your fine carriages occasionally; get out of your fashionable costumes; get into something more substantial. Get into something more substantial. Get into something more substantial.

Get into something more substantial. Get into something more substantial. Get into something more substantial.

Farm and Home.

THE USEFUL INFORMATION.

We find a story in the Memphis Avalanche which is so suggestive and so full of encouragement to those who have the least remaining spark of ambition that we will willingly give you space to it.

It appears that in the spring of 1873 a gentleman, who was financially ruined, bought a cottage and four acres of land near Memphis. There was nothing growing on the spot at the time, and one I shall never forget.

In the spring of 1874 he made a garden, planted shade and fruit trees, and flowers. At the end of the year some money had been saved, and the table had been supplied all the time. There were also eggs and spring chickens, and a cow that supplied milk and butter.

Next year strawberry plants were set out on rented land, and a good and profitable crop of sweet and Irish potatoes and turnips were raised. Another lot of 224 acres was then purchased at \$80 per acre.

Then more potatoes, strawberries, and other crops were raised. The man was raised forage to feed the team and pork to feed the family. In 1877 his books showed \$2,000 profits. Then he added 104 acres to his farm. In 1878 bought thirty-two acres and planted eight acres of cotton. In 1879 he bought one tenth of an acre in cotton, using common seed, which produced 350 pounds of seed cotton. In 1880 planted two acres, which produced four bales of cotton each. The seed cotton was sold for \$1.00 per pound, and the cotton for \$1.00 per pound. The man was raised forage to feed the team and pork to feed the family. In 1877 his books showed \$2,000 profits. Then he added 104 acres to his farm. In 1878 bought thirty-two acres and planted eight acres of cotton. In 1879 he bought one tenth of an acre in cotton, using common seed, which produced 350 pounds of seed cotton. In 1880 planted two acres, which produced four bales of cotton each. The seed cotton was sold for \$1.00 per pound, and the cotton for \$1.00 per pound. The man was raised forage to feed the team and pork to feed the family. In 1877 his books showed \$2,000 profits. Then he added 104 acres to his farm. In 1878 bought thirty-two acres and planted eight acres of cotton.
